**INDUSTRIAL VISIT AT MIDC SECTOR OF AMRAVTI IN TEXTILE MILLS
ORGANISED BY UGC SPONSORED COMMUNITY COLLEGE OF SEVADAL
MAHILA MAHAVIDYALA, NAGPUR.**

On 2 Feb 2019 a educational textile industrial tour was organized by the community college of Sevadal Mahila Mahavidyalaya Nagpur, Sakardhara. The tour planed for department of Fashion design student and department of Home Science students. College got permission to visit SuryaLaxmi Cotton mill and Verito dove pvt. ltd (garment manufacturing company) , which is situated 100 miles away from Nagpur at Amravati road.

Students at Suryalaxmi Cotton Mill, Amravati with teaching faculty.

After obtaining proper permission for the plant visit from the Plant Manager, we moved further to visit the different sections of the plant, with the group of 10-10 students with our intructors. Mr.Gupta sir instruct us about mill and working process of weaving very deeply.At the beginnig we have visited the BLOW ROOM.

The Blow Room is the starting of the spinning operation where the fiber is opened, cleaned, mixed and evened. The Air Machine is subject to suction and the dust is collected in special filters; the material, on the other hand, undergoing contemporaneously, the rotary action of the cylinder and suction along the operating width, effects a helical movement around the drum and exits from the

side opposite to that on which it entered. It is then transferred by the delivery.

Carding and Draw frame with ongoing process of machine

The carding machine is located in the spinning process between the blow room and the drawing frame. It cleans and parallelizes the fibers. That resulting card web is then formed into a tape and placed into a can. The working elements are taker-in, main cylinder, card top and doffing cylinder. After that we had been experienced with The draw frame machine, this is the machine combining and drawing slivers of a textile fiber (as of hemp for rope manufacture or cotton for spinning) drawing is the operation by which slivers are blended, doubled and leveled. The Draw frame is divided into two parts one is carded yarn and another is combed yarn.

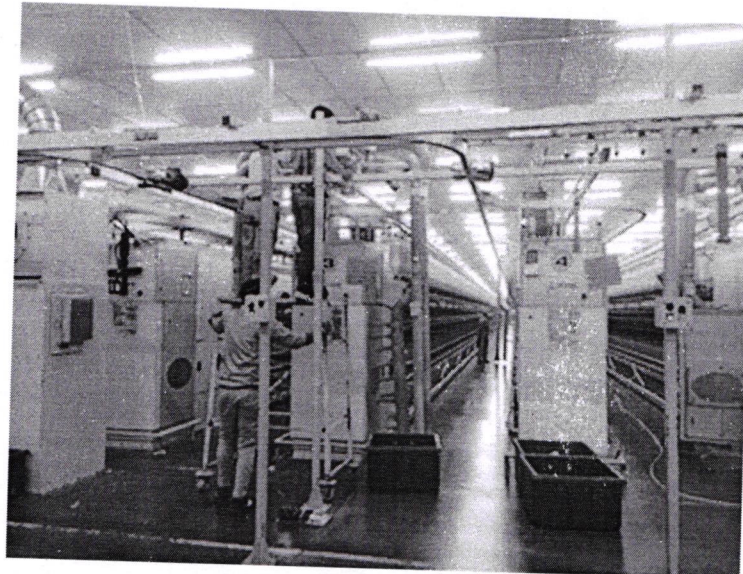

Final product of the industry, storage control room

Principal
Sevadal Mahila Mahavidyalaya
Umrer Road, Nagpur-9.

Lastly we had seen quality control department where YCP Machine (Yarn Condition Plant) is subjected to check the quality of final product . The final product of threads finally checked and monitored through YCP machine with the help of Ultra Violet Rays. Later the threads are further sent to Laboratory for testing the quality of yarn and to categories the same. Then we go for next visit at verito garment factory.\

Spinning machine with highly automatic advance technology

Verito (Dove Garments Pvt. Ltd.) The visit to second industry:

Sevalal mahila mahavidyalaya students at Verito (Dove Garments Pvt. Ltd.)

The plant is manufacturing readymade garments like Pajamas, T shirts and related products, Raw Material of Fabrics: Raw clothes in bulk quantity stored in the raw material section

Principal
Sevalal Mahila Mahavidyalaya
Umrer Road, Nagpur-9.

Pattern Making: In the process of pattern making, around 3000 layers of fabrics bind and cut together at a Stitching Department: Once the pattern and design finalized, the clothes send further for stitching department. The stitching is being done manually. The stitching process takes care of interlocking, overlocking, elastic placing time to form a particular pattern.

Stitching department of the industries employees on work.

Finishing : excess thread removal, checking of stitching quality and fabric intact. Packaging: the final product being packed in bulk for the supply in this department.

SEVADAL MAHILA MAHAVIDYALAYA
Industrial Visit Report on Community College of Fashion Design Department

On 4th February 2020 early winter morning the industrial trip was arranged by Community College Fashion Design Department at Achalpur of Paratwada district. All students were instructed according the arrangements. A travel of 250 km from Nagpur was arranged by 40 seater's bus. At 7:30am students along with four faculties.

We reached there near about the at 11 o clock of morning. The company had allotted the guide to instruct students or you can say give the information about the industry working process.

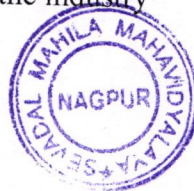

First of all we had entered the ginning industry as the textile company had divided into the two parts. first consisted of the processing unit of cotton. That consider the step of converting cotton balls tills the complete conversion into thread with finishes. Second part of company had the machine of making of thread to conversion into fabric.

Cotton lap converted into combed silver drawn and prepared for further spinning process

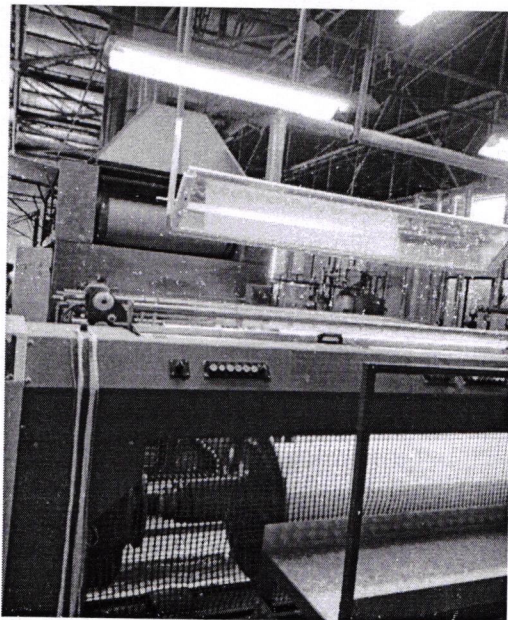

Students while visit the industry

Umrai Road, Nagpur-9.

We saw rapier loom which helps in blowing the thread and makes it ready for further weaving process in airjet loom. Students were excited as well so interested in experiencing all curriculum part in practical. They came to see the actual process of making fabric which was very thrilled for them.

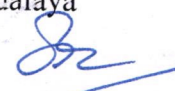

Rapier loom of industry

Also students came in interaction with the training department of the where they interact with the trainer cum instructor of the company. She was a lecturer and also had the experience in the textile department working as a textile designer for since 20 yrs. She explained the industrial structure and also explained the working processes of the machines which company are using as in processing unit. With all good wishes she blessed students for their future and we continued with the visit.
